## Abstract

This article is intended as a thought about the ideal form of organization for the Production Units. Production Units in Vocational High School aimed at three aspects: academic, economic, and social. In this article related to the economic aspect, the production would be sold to the market. We realized that the implementation of production units require a source of funds comes one of them from the government. Basically there are funds used to meet these three aspects. However, the Government provides funds primarily as a fulfillment of the academic aspect.

In accordance with PP No. 29 of 1990, Production Units is the business and professional operation. Production Unit to be able to compete in the market. Therefore, the economic aspect allows the production unit profit from selling the products. Production Unit revenue obtained legally entitled to full government. The rights of government called the Non Taxes State Revenue. While the Production Unit was formed also as efforts to provide extra income for teachers, students, school staff, and institution. During this dispute the legitimacy of the income earned can be used as income or as capital turnover business.

Therefore, the Production Units to be formed in a lawful organization to manage funds from government sources as business capital. Offered is a *Koperasi* organization is an association of some people is an enterprise for mutual benefits or profits. *Koperasi* in the form of legal entity as an alternative organization of Production Units. With formed into a *Koperasi* production unit hopes to further improve the quality of production, able to compete in the market, and able to provide welfare for students, teachers and school staff.

Keywords: Production Units, *Koperasi*, Governments.
