KRIYA KAYU
Berbasis Kearifan Lokal
YOGYAKARTA
untuk Tunagrahita Ringan SMPLB

Agung Sulistyo, S.Pd.
Prof. Dr. Kasiyan, M.Hum.
Daftar Isi

Daftar Isi ....................................................................................................................... iii
Daftar Gambar .............................................................................................................. v
Prakata .......................................................................................................................... xi

Pendahuluan .................................................................................................................. 1
A. Deskripsi Buku ........................................................................................................... 1
B. Prasyarat .................................................................................................................... 2
C. Langkah-Langkah Penggunaan Buku .................................................................... 2
D. Panduan Bagi Siswa ............................................................................................ 3
E. Peran Guru ............................................................................................................... 3
F. Tujuan Akhir ............................................................................................................. 4
G. Kompetensi Dasar ................................................................................................. 5
H. Cek Kemampuan .................................................................................................... 5

Pembelajaran 1 Pengenalan Bahan Kriya Kayu...................................................... 7
A. Ruang Lingkup Pembelajaran ............................................................................ 7
B. Tujuan Pembelajaran ......................................................................................... 7
C. Uraian Materi ..................................................................................................... 8
D. Latihan Soal ....................................................................................................... 16
E. Rangkuman ........................................................................................................ 17

Pembelajaran 2 Pengenalan Alat Kriya Kayu....................................................... 19
A. Ruang Lingkup Pembelajaran ............................................................................ 19
B. Tujuan Pembelajaran ......................................................................................... 19
C. Uraian Materi ..................................................................................................... 20
D. Tugas .................................................................................................................. 42
E. Rangkuman ........................................................................................................ 45

Pembelajaran 3 Produksi Kriya Kayu Teknik Sekrol.............................................. 47
A. Ruang Lingkup Pembelajaran ............................................................................ 47
B. Tujuan Pembelajaran ................................................................. 47
C. Uraian Materi ........................................................................... 48
D. Tugas ........................................................................................ 83
E. Rangkuman ............................................................................... 84

Pembelajaran 4 Ornamen Khas Daerah Istimewa Yogyakarta........ 87
A. Ruang Lingkup Pembelajaran ................................................... 87
B. Tujuan Pembelajaran ................................................................. 87
C. Uraian Materi ........................................................................... 88
D. Tugas ........................................................................................ 103
E. Rangkuman ............................................................................... 105

Gambar 4.24 Motif Tiang Lampu ....................................................................... 100
Gambar 4.25 Motif Beringin Kembar ................................................................. 100
Gambar 4.26 Motif Tugu Golong-Gilig ................................................................. 100
Gambar 4.27 Motif Kraton Jogja ........................................................................ 101
Gambar 4.28 Motif Jogja Istimewa................................................................. 101
Gambar 4.29 Motif Andong ......................................................................... 101
Gambar 4.30 Motif Gunungan................................................................. 101

Buku ini dapat terselesaikan berkat dukungan dan kerjasama dari berbagai pihak, untuk itu pada kesempatan ini, kami mengucapkan terima kasih kepada yang terhormat:

3. Direktur Pascasarjana, Universitas Negeri Yogyakarta, yang telah memberikan segala dukungan dan fasilitasi selama dalam penyelesaian karya ini.

5. Kepala sekolah SLB Negeri 2 Yogyakarta; beliau telah memberikan izin, kritik, dan saran berkaitan dengan penelitian ini sehingga proses penyusunan dan pengembangan buku ini dapat terselesaikan.

7. Guru wali kelas jenjang SMPLB di SLB Negeri 2 Yogyakarta; beliau telah banyak memberikan ide dan gagasan untuk penyempurnaan bahasa dalam buku ini.

Kami menyadari bahwa masih banyak kekurangan dalam penyusunan dan pengembangan buku ini. Untuk itu, kritik dan saran bagi kesempurnaan buku ini sangat kami harapkan. Semoga buku keterampilan kriya kayu berbasis kearifan lokal ini dapat memberikan peningkatan dalam pembentukan sikap, pengetahuan, dan keterampilan kriya kayu siswa dalam pembelajaran.

Yogyakarta, November 2020
