Advances in Robotics Research, An International Journals

You have a Free online access/download for a limited time.

Volume 1, Number 1, January 2014

CONTENTS

- **Overview of flexure-based compliant microgrippers**
Wenji Ai and Qingsong Xu
[Abstract; Full Text \(1462K\)](#) *pages 1-19.*
- **Design and development of an automated all-terrain wheeled robot**
Debesh Pradhan, Jishnu Sen and Nirmal Baran Hui
[Abstract; Full Text \(1845K\)](#) *pages 21-39.*
- **Nash equilibrium-based geometric pattern formation control for nonholonomic mobile robots**
Seung-Mok Lee, Hanguen Kim, Serin Lee and Hyun Myung
[Abstract; Full Text \(1609K\)](#) *pages 41-59.*
- **Dynamic characterisation of a two-link flexible manipulator: theory and experiments**
M. Khairudin, Z. Mohamed, A.R. Husain and R. Mamat
[Abstract; Full Text \(1725K\)](#) *pages 61-79.*
- **On low cost model-based monitoring of industrial robotic arms using standard machine vision**
Aris Karagiannidis and George C. Vosniakos
[Abstract; Full Text \(1770K\)](#) *pages 81-99.*
- **Biologically inspired modular neural control for a leg-wheel hybrid robot**
Poramate Manoonpong, Florentin Wörgötter and Pudit Laksanacharoen
[Abstract; Full Text \(2587K\)](#) *pages 101-126.*
