vhfa/visiting researcher

Arnhem
21 January 2010

During three months (November 2009, December 2009, January 2010) Ms. Ratna Wardani, researcher at the Electronic Engineering Department of Gadjah Mada University in Indonesia participated as a visiting researcher in the Research and Competence Group Data Architectures & Metadata Management in the Academy of Communication and Information Technology (ICA) in HAN University of Applied Sciences, located in HAN campus Arnhem in The Netherlands. She got an own desk to work at and all administrative support and other rights that a research employee in HAN University is entitled to.

During her stay she worked on her own research project as set out before in Gadjah Mada University.

Apart from staff members and research employees in HAN University meetings were arranged with Prof. Jaap van Till, emeritus professor in Telecommunication from HAN University and – via him – with Prof. Erik Huizer from Utrecht University.

Mrs. Lia Venhof
Secretary of Prof. Guido Bakema
(and as such allowed to sign this letter on behalf of him)
