PENCAK SILAT MARTIAL MEDIA LEARNING FOR HIGH SCHOOL STUDENTS EXTRAORDINARY BLIND (SMALB - A)

By. Nur Rohmah Muktiani
Yogyakarta State University

ABSTRACT

The learning process of quality martial arts are influenced by various factors. The existence of a systemic and synergistic linkages between the factors teachers, students, materials, media, facilities, and learning systems, comes together in a learning process. Utilizing the media to accommodate students with different modalities. In the normal learning plan for exceptional schools require various modifications to the learning outcomes to meet the needs of all students. Characteristics SMALB-A student who requires a unique approach to learning and the selection of appropriate media. The learning process is basically a process of information or communication. The existence of the message to be conveyed through a channel message to the recipient without creating differences in the contents. Here is the function of media in learning to help bridge the delivery of messages. Media learning martial arts is needed in the learning process of quality martial arts in SMALB-A.

Keywords: *media, learning, martial arts, SMALB-A*

A. BACKGROUND

Providing education for children with special needs can be done in various ways, including through physical education and sport. Model development empowerment of children with special needs can be done through physical education programs commonly referred to as adaptive physical education (adjusted). Sensorimotor abnormalities in children

with visual impairments in general are usually more easily identified, the majority of children who have problems in sensorimotor can learn and go to school with such good children who are not abnormal. With appropriate learning approach assisted with the right media also it will help students achieve the learning competence. Learning Media is an important component in the learning
